Blowback

PEJ News - Blowback is the rage that happens when you trick someone and then they discover they have been tricked. PM Harper has led everyone down the garden path. First he bails out his struggling minority in the polls by stealing the agenda of the progressive political parties as his own. Now Harper has done a complete turn around. We have been taken for a ride again. Not only is his new plan another hot air plan, the Tories are backing out on Kyoto and taking the stance again that it will cost too much.

www.PEJ.org Havent we been here before? How many times do people need to get kicked in the head before they smarten up and throw the government out?
