Regarding controversy on NAFTA:

PEJ News - Our Canadian Government has been recently suggesting that Canada is opposed to tampering with NAFTA. This has sent a chill through the US.

The truth is much different and Canadians really think that NAFTA stinks. The fossil fools are getting rich at the expense of our standard of living and freedoms.

www.PEJ.org Trading long distance adds to the GHG problem. NAFTA prevents countries from protecting the environment. The "Tar Sands" in Northern Alberta is adding to the recent uproar over NAFTA because all that oil is going to the US under a NAFTA agreement.

Time to look in on where campaign contributions for the politicians are coming from.
